Dear Residents,

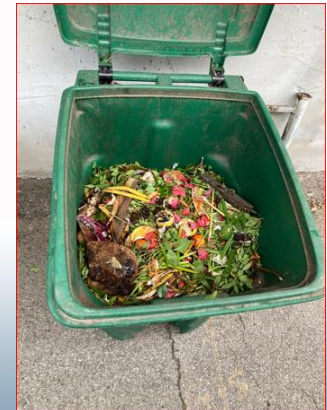

As of January 1, 2022, Beverly Hills residents will be required to separate and recycle organic waste. Single-family residents already have a green waste container service for yard trimming material. However, under SB 1383, a California law requiring organic waste collection and recycling services, this service will be expanded to include additional food waste items, including food-soiled paper and organic material, in the residential green waste program.

Additionally, residents will notice new labels on their mixed waste cart (black/gray or blue) and green organics cart. These labels will show common acceptable and unacceptable materials for each waste stream to encourage proper sorting of materials, thereby reducing recycling contamination.

To assist residents with separating organic material (food scraps) from the mixed waste, the City will provide a small 2-gallon food scrap pail for each single-family residential property. In addition, residents can pick up a food scrap container at the Public Works building located at 345 Foothill Road. Residents must provide proof of residency by providing their ID and utility bill. The food collected in the container can be emptied into the organics cart, also known as the green waste bin, for organics recycling.

For more information, including answers to frequently asked questions and resources, please visit us at www.beverlyhills.org/organics.

If you have questions, please contact Beverly Hills Public Works Customer Service at (310) 285-2467 or via email at AskPW@beverlyhills.org.
